In patients who do not communicate verbally, there are many cues that can lead a psychiatrist to recognition of psychosis.

Ruth Myers MD (USA) formerly Ruth Ryan

Persons with intellectual disabilities (also called learning disability or mental handicap) and/or developmental disabilities such as autism are vulnerable to the same psychiatric conditions as anyone else (Szymanski et al 1990). Many standard psychiatric diagnostic criteria can be easily adapted to persons who do not use speech to communicate. For example, the criteria around sleep disturbance or appetite changes in diagnosis of mood disorders can be described by others who observe the person.

However, recognition of psychosis (hallucinations, delusions, or paranoia) requires the examiner to try to ascertain the internal perceptual experiences of persons who do not use the same primary spoken language as the examiner. One way to try to gather this information is to observe details of a person's behaviour and compare these behaviours to those of persons with known psychotic symptoms. The examiner must not only make his or her own observations, but must also very intentionally gather the observational data from those who know the person well.

An additional complicating issue is that many of the same behaviours that might indicate psychosis can also be indicators of equally significant but very different (and much more common) neuropsychiatric phenomena. For example, a person who is experiencing a visual migraine aura might appear to be "looking at things that aren't there". Thus, although careful observation is important, it is at least as important to interpret the observations in the context of the person's other

symptoms and life experiences.

Apps

Breathe

The phrase 'watch your breath' is common among meditation practitioners, and is actualised in Breathe: there are animations to signal your inhales and exhales, and you have tools to customize the length of each breath.

Employment Opportunities

REACH Region III Is Hiring!

The **REACH** program is the statewide crisis system of care that is designed to meet the crisis support needs of individuals who have a developmental disability and are experiencing crisis events which put them at risk for homelessness, incarceration, hospitalization, and/or danger to self or others.

REACH services are available statewide, with one regional program being located in each of the Commonwealth's five DD regions.

REACH Mission Statement

Individuals with intellectual and/or developmental disabilities shall be supported with services that allow the individual to live the most inclusive life possible in his/her community which includes access to appropriate and effective crisis stabilization, intervention, and prevention services including mental health treatment services when indicated.

What does it mean to our staff to work for REACH?

"I enjoy working in the REACH program as it allows me to be creative and to utilize skills and abilities that most programs do not. REACH services also allows me the opportunity to witness the impact of my work on clients and their families/providers." - Junior Stoots, REACH Coordinator

"Working for REACH means to me being the first line of support when working with a challenging population. It means being flexible and dependable for my co-workers and the consumers we serve." –
Nicole Dailey, CSP II-Utilization and Training

REACH Region III - Southwestern Virginia.

Areas Served:

Virginia CommonHelp

In these difficult times, many Virginians are looking for assistance with essential services.

Virginia CommonHelp makes it easy for you to apply for multiple Department of Social Services programs using one online application.

CommonHelp partners with several government agencies to offer Virginians a fast and easy way to apply for a wide range of services:

- Help with paying for childcare
- Home energy assistance
- Help with buying food
- Low or no-cost healthcare
- Temporary cash assistance for families with children

To determine your eligibility for one or more programs, you can complete CommonHelp's [online eligibility portal](#). The portal will tell you which programs you qualify for and how to apply for them online. Visit the [CommonHelp website](#) to learn more about the programs and government agencies that they partner with.
